## Digital Thermometer English

Indicator	Case	Remedy
L (low)	The sensor is not yet the correct estimated temperature indication. To complete the measurement, please wait until the temperature in the ambient between 2-5 minutes.	This is not an error so it may be good to leave the thermometer in the section for a few more seconds.
H (high)	The sensor is still the correct estimated temperature indication. Please take the temperature.	Cool the sensing section and then take the temperature.

**Introduction**

Thank you for purchasing the OMRON Digital Thermometer Model Flex Temp Smart.

The thermometer you purchased offers a accurate and quick temperature measurement.

It can measure the temperature in the arm (rectal), in the mouth (oral) or in the axilla (axillary).

It is also able to measure the temperature anywhere without broken glass or mercury hazard.

It is also able to measure the temperature affected by eating, drinking or smoking.

Correctly using the thermometer will give you many benefits.
